NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS DEVICE. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE DEVICE.

CE Notice

This device complies with **EMC Directive 2014/30/EU** and **“Low Voltage Directive”** issued by the Commission of the European Community.

UL Notice

This manual refers to UL certified products and conforms to UL 62368-1, 2nd Edition, 2014-12-1, CAN/CSA-C22.2 No. 62368-1-14 and IEC 62368-1:2014 STANDARD FOR Information Technology Equipment - Safety - Part 1: General Requirements.

WEEE Notice

The **WEEE** mark applies only to countries within the European Union (EU) and Norway.

This appliance is labeled in accordance with **European Directive 2002/96/EC** concerning **waste electrical and electronic equipment (WEEE)**. The Directive determines the framework for the return and recycling of used appliances as applicable throughout the European Union. This label is applied to various products to indicate that the product is not to be

thrown away, but rather reclaimed upon end of life per this Directive.

CAUTION :

Risk of Explosion if Battery is replaced by an incorrect Type.

Dispose of Used Batteries According to the instructions.

Safety

IMPORTANT SAFETY INSTRUCTIONS

To disconnect the machine from the electrical Power Supply, turn off the power switch and remove the power cable plug from the wall socket. The wall socket must be easily accessible and in close proximity to the machine.

Read these instructions carefully. Save these instructions for future reference.

Follow all warnings and instructions marked on the product.

Do not use this product near water.

Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.

Slots and openings in the cabinet and the back or bottom are provided for ventilation; to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.

This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local

power company.

Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

Ensure that the device connects to a socket/outlet with ground/earth connection.

5. POS System Assembly & Disassembly

Diagrams of YUNO-C 151 are used as a representative of all YUNO-C POS System series for elaboration in the rest of this manual.

5.1 Open the System Cover

Open the System Cover by pressing the System Cover Release Button.

5.2 Replace the Storage Disk Drive

YUNO-C POS System series offers two M.2 slots to allow you to equip it, when using with Intel® Core™ Processors.

Make sure the unit is powered off before starting.

Please follow the below steps to finish the replacement :

1. Remove the System Cover

To open the System Cover, please refer to the procedures described in Chapter 5-1 and remove it.

YUNO-C151 / C156

2. Remove the NVMe Protection Bracket

Slightly press its Plastic Spring Arm inward and pull out the NVMe Protection Bracket outward gently with its semi-circular opening.

3. Remove the old drive (if applicable)

If you are going to remove a NVMe, make sure all of the cables are disconnected from both the motherboard and the power supply. The mechanism involves a rubber component that locks the end of the SSD. Lift the SSD from horizontal position and remove it from the rubber inner groove.

4. Insert your new drive.

Remove it from the antistatic packaging and slide it into your target drive slot of storage housing properly. Press the SSD to horizontal position and fix with the rubber inner groove.

5. Secure the storage disk drive.

Once the storage disk drive has been completely inserted, fix with the rubber inner groove and cover it back with the storage protection bracket.

*Secondary drive should be connected to the next available M.2 slot.

6. Put back the NVMe Protection Bracket

Simply slide it in until a “click” sound is heard to ensure it in place.

7. Get ready to power on the system.

YUNO-C151 / C156

Close up the System Cover.

Reconnect the cable plug onto the wall socket and turn your YUNO-C on.

8. Finish the replacement.

If you are replacing your primary drive, you'll have to reinstall your operating system. If you are adding a new drive, you'll need to format the drive before you can use it.

5.3 Replace the Memory

Make sure the system is powered off before starting.

CAUTION :

or Hot parts!

Burn fingers when handling the parts.

Wait for one-half hour after switching off before handling the parts.

Please follow the below steps to finish the replacement :

1. Remove the System Cover

To open the System Cover, please refer to the procedures described in Chapter 5-1 and remove it.

YUNO-C151 / C156

2. Locate the memory slot at the left rear side of the system.

YUNO-C151 / C156

3. Flip the ejector clips outwards to remove the memory module from the memory slot.

4. Slide the memory module into the memory slot and press down until the ejector clips snap in place.

5. Close up the System Cover.

YUNO-C151 / C156

5.4 Install the Power Adapter

The system is equipped with a 65W power adapter. Please follow below procedures to get it plugged into the system.

1. To open the System Cover, please refer to the procedures described in Chapter 5-1, and remove it.

YUNO-C151 / C156

2. Locate the power connector on the I/O panel (please refer to Chapter 2-5) and connect the plug of power adapter directly to the DC-IN jack. Route the DC cord connection securely.

3. Remove the L-Stand / VESA Cover to locate the rest of DC cord properly.

YUNO-C151 / C156

4. After finish, slide in the L-Stand / VESA Cover and close up the System Cover.

YUNO-C151 / C156

5.5 Install the Wall-mount

Before you begin, make sure you have two screws that indicate a diameter measurement of 0.1377 inches (3.5mm).

1. Determine where you want to mount the YUNO-C POS System series.
2. Drill two holes into the wall. Make sure adjacent holes are 2.95 inches (75mm) apart.
3. Insert a screw into each hole, and leave 0.2 inches (5mm) of its head exposed.
4. Maneuver the YUNO-C POS System series so the wall-mount slots line up with the two screws.
5. Place the wall-mount slots over the screws and slide the YUNO-C POS System series down until the screws fit snugly into the wall-mount slots.

YUNO-C POS System series follows VESA Mounting Interface Standard to allow you to mount the elegant bezel-free panel PC to a stand or wall with four M4 screws easily.

The horizontal and vertical distance between the tapped holes on YUNO-C POS System series is 75 mm.

Make sure the system is powered off before starting.

Please follow the below steps to get it ready for the mounting process :

1. Remove the System Cover.

To open the System Cover, please refer to the procedures described in Chapter 5-1, and remove it.

2. Remove the L-Stand Cover.

3. Detach the panel PC by unscrewing the **10** pcs of screws from the L-Stand Cover.

4. Remove the 4 pcs of rubber cap from the System Cover.

5. Get ready to the mounting process.

YUNO-C151 / C156

Close up the System Cover and then mount it to a stand or wall with four M4 screws easily.

6. Peripherals Installation

6.1 Install the Cash Drawer

You can install a cash drawer through the cash drawer port.

Please verify the pin assignment before installation.

Note: Please follow the Cash Drawer control signal design to control the Cash Drawer.

Cash Drawer Control Command Example

Use Debug.EXE program under DOS or Windows98

Command	Cash Drawer
O 48C 04	Opening
O 48C 00	Allow to close
➤ Set the I/O address 48Ch bit2 =1 for opening Cash Drawer by "DOUTbit0" pin control. ➤ Set the I/O address 48Ch bit2 = 0 for allow close Cash Drawer.	

Command	Cash Drawer
I 48C	Check status
➤ The I/O address 48Ch bit6 =1 mean the Cash Drawer is opened or not exist. ➤ The I/O address 48Ch bit6 =0 mean the Cash Drawer is closed.	

6.2 Install the Attachment-type Customer Display (YUNO-VFD) and Second Display (YUNO-2NDLCD10.1)

The Attachment-type Customer Display (YUNO-VFD) and Second Display (YUNO-2NDLCD10.1) can be installed from the rear top side of the system. Make sure the unit is powered off before starting.

Please follow the below steps to finish the installation :

1. Unscrew the two pcs of screws from the rear top service door and remove it.
2. Connect the Customer Display / Second Display cable with the connector of the system. Locate this connection properly.
3. Insert the Customer Display / Second Display in place and fasten the two pcs of screws to make it secure.

Installed with YUNO-VFD

Installed with YUNO-2NDLCD10.1

6.3 Install other Attachment-type Peripherals

Attachment-type peripherals, including YUNO-MSR, YUNO-SCANNER2D, YUNO-DALLAS and YUNO-ADDIMAT Reader, may be easily installed at either side of the system. YUNO-MSR is used as an installation representative for elaboration.

Make sure the unit is powered off before starting.

Please follow the below steps to finish the installation :

1. Unscrew the two pcs of screws from the selected side service door and remove its cover.
2. Place the Peripheral Adapter and connect the peripheral with the connector of the system. Locate this connection properly.

3. Insert the peripheral in place and fasten the two pcs of screws to make it secure.
