

# Line display firmware Update unblock method

1. Check your VFD COM Port number
2. If is on COM1
3. Please modify "Restore.bat"

From

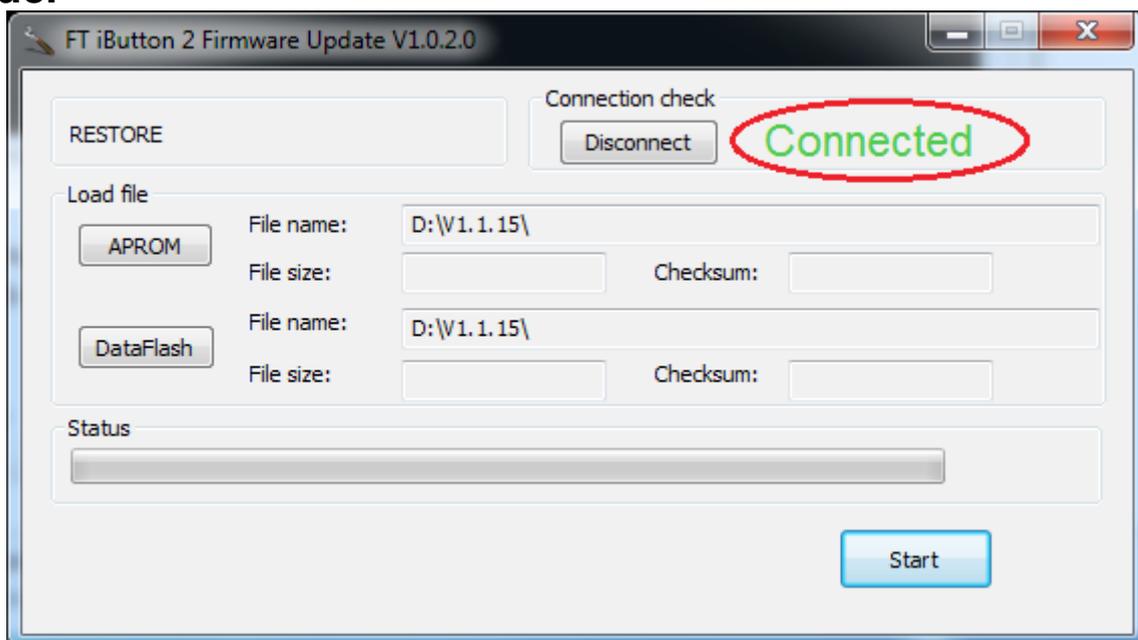

nuc100Writer.exe RESTORE **COM1** 9600,N,8

To

nuc100Writer.exe RESTORE **COM3** 9600,N,8

Then save file

4. Execute "Restore.bat" then click "Connect" button when you see green "Connected" it means this VFD is unblock form ISP mode.

5. Click "Disconnect" button then exit application.
