

USER MANUAL

VERSION 1.3 June 2012

Metal Panel PC Hardware System

The information contained in this document is subject to change without notice. We make no warranty of any kind with regard to this material, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. We shall not be liable for errors contained herein or for incidental or consequential damages in connection with the furnishing, performance, or use of this material.

This document contains proprietary information that is protected by copyright. All rights are reserved. No part of this document may be photocopied, reproduced or translated to another language without the prior written consent of the manufacturer.

TRADEMARK

Intel®, Pentium® and MMX are registered trademarks of Intel® Corporation. Microsoft® and Windows® are registered trademarks of Microsoft Corporation. Other trademarks mentioned herein are the property of their respective owners.

Safety

IMPORTANT SAFETY INSTRUCTIONS

1. To disconnect the machine from the electrical power supply, turn off the power switch and remove the power cord plug from the wall socket. The wall socket must be easily accessible and in close proximity to the machine.
2. Read these instructions carefully. Save these instructions for future reference.
3. Follow all warnings and instructions marked on the product.
4. Do not use this product near water.
5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register or in a built-in installation unless proper ventilation is provided.
7. This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord.
9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

This device complies with the requirements of the EEC directive 2004/108/EC with regard to “Electromagnetic compatibility” and 2006/95/EC “Low Voltage Directive”.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

CAUTION ON LITHIUM BATTERIES

There is a danger of explosion if the battery is replaced incorrectly. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer’s instructions.

Battery Caution

Risk of explosion if battery is replaced by an incorrectly type. Dispose of used battery according to the local disposal instructions.

Safety Caution

Note: To comply with IEC60950-1 Clause 2.5 (limited power sources, L.P.S) related legislation, peripherals shall be 4.7.3.2 “Materials for fire enclosure” compliant.

4.7.3.2 Materials for fire enclosures

For MOVABLE EQUIPMENT having a total mass not exceeding 18kg.the material of a FIRE ENCLOSURE, in the thinnest significant wall thickness used, shall be of V-1 CLASS MATERIAL or shall pass the test of Clause A.2.

For MOVABLE EQUIPMENT having a total mass exceeding 18kg and for all STATIONARY EQUIPMENT, the material of a FIRE ENCLOSURE, in the thinnest significant wall thickness used, shall be of 5VB CLASS MATERIAL or shall pass the test of Clause A.1

LEGISLATION AND WEEE SYMBOL

2002/96/EC Waste Electrical and Electronic Equipment Directive on the treatment, collection, recycling and disposal of electric and electronic devices and their components.

The crossed dust bin symbol on the device means that it should not be disposed of with other household wastes at the end of its working life. Instead, the device should be taken to the waste collection centers for activation of the treatment, collection, recycling and disposal procedure.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract.

This product should not be mixed with other commercial wastes for disposal.

Revision History

Changes to the original user manual are listed below:

Revision	Description	Date
1.0	• Initial release	April 2011
1.1	• IdeaCom touch driver installation added	June 2011
1.2	• C68 MB added	March 2012
1.3	• C56 MB added	June 2012

2-4. Dimensions

2-4-1. 10.1" System

2-4-2. 15.6" System

2-4-3. 18.5" System

2-4-4. 21.5" System

3. System Assembly

3-1. Open the Chassis Cover

The motherboard and RAM module can be replaced by opening the chassis cover, which is located on the back side of the system. Please follow the steps below to open the chassis cover.

1. Turn to the back side of the system and loosen the thumb screws (x2) to release the cable cover first.

2. Loosen the hex socket cap screws (x8) to open the back cover of the system.

* An allen wrench is included in the package for simple assembly. Please use it to tighten/loosen the screws.

3-2. RAM Module Replacement

To remove and replace the RAM module, please open the chassis cover firstly as steps dscribed in chapter 3-1.

Removing a RAM module

1. Find the memory slot at the right side of the motherboard.

C48 Motherboard

C68 Motherboard

C56 Motherboard

2. Flip the ejector clips outwards to remove the memory module from the memory slot.

Installing a RAM module

3. Slide the memory module into the memory slot and press down until the ejector clips snaps in place.

3-3. HDD Replacement

To remove and replace the HDD, please open the cable cover firstly as steps described in chapter 3-1-1.

K757 / K758 / K759

1. Find the HDD located at the right side.

2. Pull the HDD tray from the system. For easier removal pull the plastic sheet (see picture) at the same time.

3. Attach the HDD to the HDD tray and slide it into the slot until it snaps in place.

* Please note the top of the HDD should be on the upper side.

K755

1. Loosen the screws(x2) to remove the HDD bracket from the system.

2. The HDD is secured by the bracket, remove the screws(x2) to release the bracket and replace the HDD.

4. Peripheral Installation

4-1. MSR Installation

To install MSR, please open the cable cover firstly as steps described in chapter 3-1-1.

1. Insert MSR module in place and fasten the screws (x2) on the back to secure the module.

2. Connect MSR cable to the connector on system side.

2. Close the cable cover and fasten screws (x2). Make sure the MSR cable is threaded through the MSR cable hole on the system.

4-2. Stand Installation

1. Place the system face down. Make sure not to scratch the screen.
2. Attach the stand to the back of the system.

3. Fasten the screws(x4) to secure the stand.

4-3. Cash Drawer Installation

You can install a cash drawer through the cash drawer port. Please verify the pin assignment before installation.

Cash Drawer Pin Assignment

Pin	Signal
1	GND
2	DOUT bit0
3	DIN bit0
4	12V / 19V
5	DOUT bit1
6	GND

Cash Drawer Controller Register

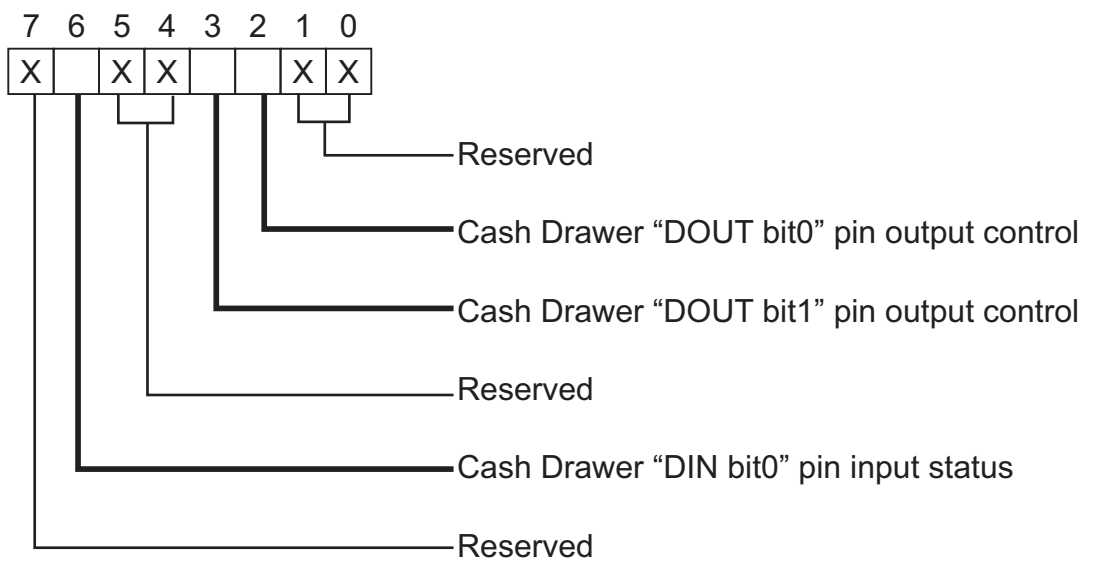

The Cash Drawer Controller use one I/O addresses to control the Cash Drawer.

Register Location: 48Ch

Attribute: Read / Write

Size: 8bit

BIT	BIT7	BIT6	BIT5	BIT4	BIT3	BIT2	BIT1	BIT0
Attribute	Reserved	Read	Reserved		Write		Reserved	

- Bit 7: Reserved
- Bit 6: Cash Drawer "DIN bit0" pin input status.
 - = 1: the Cash Drawer closed or no Cash Drawer
 - = 0: the Cash Drawer opened
- Bit 5: Reserved
- Bit 4: Reserved
- Bit 3: Cash Drawer "DOUT bit1" pin output control.
 - = 1: Opening the Cash Drawer
 - = 0: Allow close the Cash Drawer
- Bit 2: Cash Drawer "DOUT bit0" pin output control.
 - = 1: Opening the Cash Drawer
 - = 0: Allow close the Cash Drawer
- Bit 1: Reserved
- Bit 0: Reserved

Note: Please follow the Cash Drawer control signal design to control the Cash Drawer.

Cash Drawer Control Command Example

Use Debug.EXE program under DOS or Windows98

Command	Cash Drawer
O 48C 04	Opening
O 48C 00	Allow to close
<ul style="list-style-type: none"> ▶ Set the I/O address 48Ch bit2 =1 for opening Cash Drawer by "DOUT bit0" pin control. ▶ Set the I/O address 48Ch bit2 = 0 for allow close Cash Drawer. 	

Command	Cash Drawer
I 48C	Check status
<ul style="list-style-type: none"> ▶ The I/O address 48Ch bit6 =1 mean the Cash Drawer is opened or not exist. ▶ The I/O address 48Ch bit6 =0 mean the Cash Drawer is closed. 	

5. Specification

Model Name	K757	K758
Mainboard	C48	
CPU	Intel Pineview dual core D525 1.8G	
Chipset	Intel ICH8M	
System Memory	2 x DDR3 SO-DIMM slot, up to 4GB	
Graphic Memory	Intel GMA 3150 share system memory up to 256MB	
LCD/Touch Panel		
LCD Size	15.6" LED LCD	18.5" LED LCD
Brightness	250 nits	
Maximal Resolution	1366 x 768	
Touch Screen Type	Ture flat resistive touch / True flat projected capacitive touch	
Storage		
HDD	2.5" Slim HDD bay, SATA HDD	
Peripherals		
Web Cam (Build-in)	2M Web Cam	
WiFi (Optional)	802.11 b/g/n WLAN card	
MSR-right side(Optional)	3 Track(USB)	
Expansion		
Mini PCI-E Socket	1	
External I/O Ports		
USB 2.0	4 x USB Type A	
Serial COM	4 (RJ45 type, COM1/COM2 standard COM, COM3/COM4 with +5V/+12V power selection)	
Parallel	1 x D-sub 25F	
LAN (10/100/1000)	1 x RJ-45	
2nd VGA	1 x DB 15F	
Cash Drawer	1 x RJ-11 (12V or 24V)	
Audio Jack	1 x Mic-in, 1 x Line-out	
DC Jack	1 x Latch Type (4 pin)	
e-SATA	Blind Hole	
Power Button	1	
Thermal Solution		
Thermal Solution	Fanless	
Audio		
Speaker	2 x 2W	
Power		
Power Adapter	DC 19V / 90W	

Environment		
EMC & Safety	FCC Class A, CE, LVD	
Operating Temperature	0°C ~ 40°C (32°F ~ 104°F)	
Storage Temperature	-20° ~ 60°C (-4°F ~ 140°F)	
Operating Humidity	5% - 95% RH non-condensing	
Storage Humidity	5% - 95% RH non-condensing	
Dust & Water Proof	IP 54 (front panel)	
Dimensions (W x D x H)	396 x 245 x 48 mm	464 x 284 x 48 mm
Weight (N.W./G.W.)	4.5kg / 5.5kg	6.8kg / 7.8kg
Mounting	75mm x 75mm Standard VESA / Panel Mount	
OS Support	Windows XP Pro, Linux , POS Ready 2009,Windows Vista ,Windows 7

COM3 & COM4 Power Setting

COM3 and COM4 can be set to provide power to your serial device.

The voltage can be set to +5V or 12V by setting jumper JP18 on the motherboard. When enabled, the power is available on pin 10 of the RJ45 serial connector. If you use the serial RJ45 to DB9 adapter cable, the power is on pin 9 of the DB9 connector.

By default, the power option is disabled in the BIOS.

BIOS/Utility setup

1. Press key to enter BIOS SETUP UTILITY when system boot up.
2. Find tab "Advanced".
3. Select "Power Configuration COM/VGA Ports" and press <Enter> to go to sub screen.

4. To switch on the power, select "Power". Please save the change before exiting BIOS so as to go for physical jumper adjustment.

CMOS Operation Mode

CMOS Reset

To clear the CMOS,

1. Remove the power cable from the system.
2. Open the system, and set the 'CMOS Operation jumper' from 'CMOS Normal' to 'CMOS Reset'. (refer to the jumper shown below)
3. Connect the power cable to the system, and **power on the system**:
in ATX mode: press the power button and it will fail power on
in AT mode: turn on system power
4. Remove the power cable from the system.
5. Return the "CMOS Operation mode" jumper setting from "CMOS Reset" to "CMOS normal".
6. Connect the power cable and power on the system.

2nd VGA Power Setting

VGA port power must be on through BIOS/Utility for default is "No Power".

BIOS/Utility setup

1. Press key to enter BIOS SETUP UTILITY when system boot up.
2. Find tab "Advanced".
3. Select "Power Configuration COM/VGA Ports" and press <Enter> to go to sub screen.

- To switch on the power, select "+12V". Please save the change before exiting BIOS to avoid data lost.

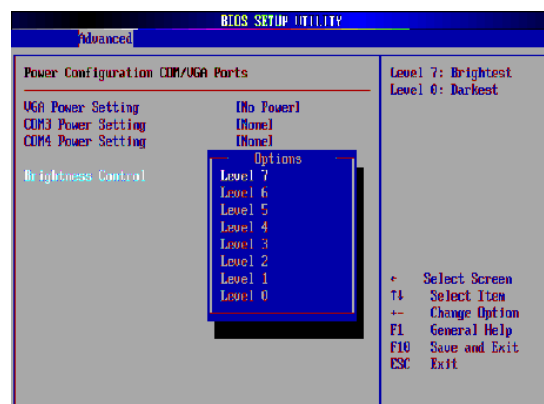

LCD Brightness Control Setting

Please note Brightness Control can only be set by setting jumper JP14 for CCFL on the motherboard C48 V2.1. By default, the inverter is CCFL on the motherboard jumper setting.

- Power on the system, and press the key when the system is booting up to enter the BIOS Setup utility.
- Select the Advanced tab.
- Select Power Configuration COM/VGA Ports and press <Enter> to go to display the available options.

- To change the brightness, select "Brightness Control" and press <Enter>. Choose the desired brightness level (0~7) press <Enter>. Save the change by pressing F10. NOTE: the new brightness will take effect after the system has restarted.

COM3 & COM4 Power Setting

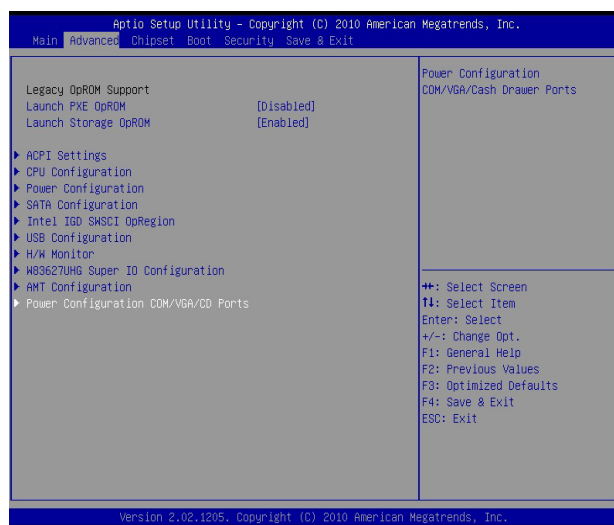

COM3 and COM4 can be set to provide power to your serial device.

The voltage can be set to +5V or 12V by setting jumper JP18 on the motherboard. When enabled, the power is available on pin 10 of the RJ45 serial connector. If you use the serial RJ45 to DB9 adapter cable, the power is on pin 9 of the DB9 connector.

By default, the power option is disabled in the BIOS.

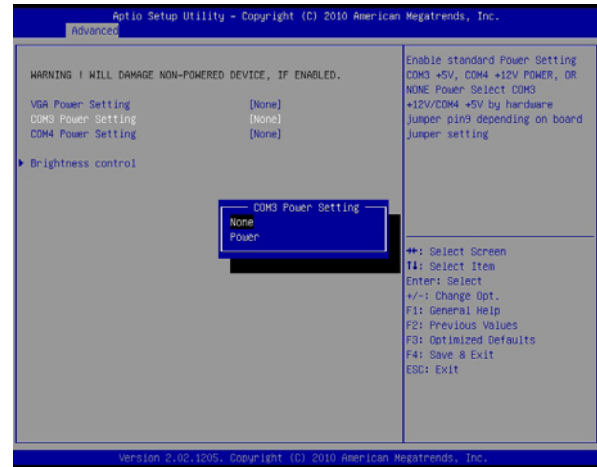

BIOS/Utility setup

1. Press key to enter BIOS SETUP UTILITY when system boot up.
2. Find tab "Advanced".
3. Select "Power Configuration COM/VGA Ports" and press <Enter> to go to sub screen.

▲ = Manufacturer Default Setting

- To switch on the power, select "Power". Please save the change before exiting BIOS so as to go for physical jumper adjustment.

COM2/COM3/COM4 Power Setting

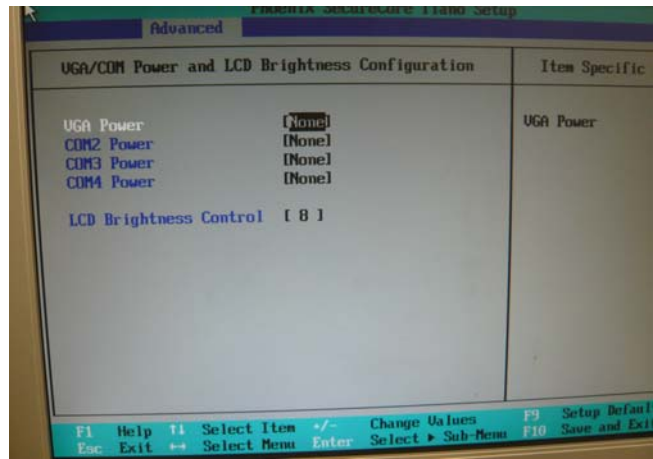

COM2, COM3 and COM4 can be set to provide power to your serial device. The voltage can be set to +5V or +12V by setting jumper JP5 and JP6 on the motherboard. When enabled, the power is available on pin 10 of the RJ45 serial connector. If you use the serial RJ45 to DB9 adapter cable, the power is on pin 9 of the DB9 connector. By default, the power option is disabled in the BIOS.

Enable COM2/ COM3/COM4 power in BIOS

1. Power on the system, and press the key when the system is booting up to enter the BIOS Setup utility.
2. Select the Advanced tab.
3. Select **VGA/COM Power and LCD Brightness Configuration** Ports and press <Enter> to go to display the available options.

- To enable the power, select COM2 , COM3 or COM4 Power setting and press <Enter>. Select Power and press <Enter>. Save the change by pressing F10.

2nd	VGA Port	JP3/6	Monitor

6-4. IdeaCom Touch Driver Installation

If your system is installing with the POS touch driver, please follow the below steps to remove the driver first.

1. Click <Start>

2. Click <All Programs> in the Start Menu

3. Click <TouchUtility>

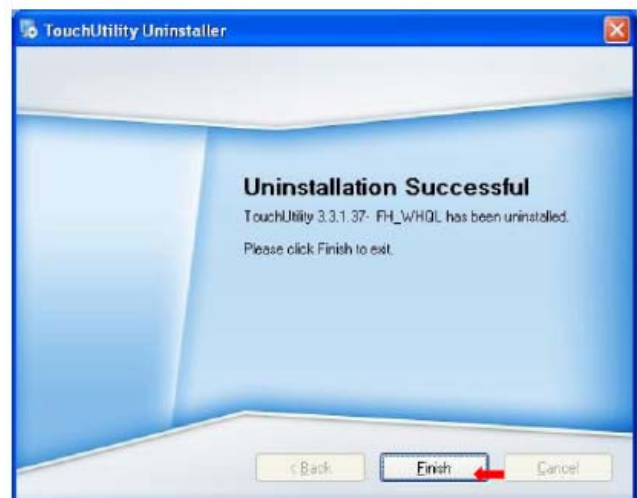

4. Click <Uninstall TouchUtility>

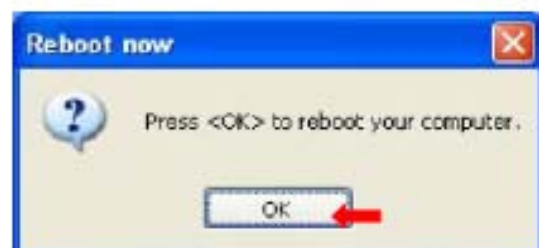

5. Click <Next>

6. Click <Finish> to exit.

7. Click <OK> to reboot your system to complete the uninstallation of POS touch driver.

Please follow the below steps to install the IdeaCom touch driver.

Driver Location

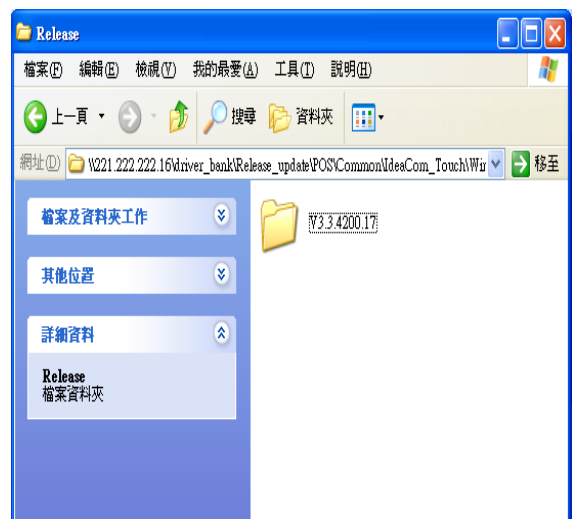

Folder/File	File Description
<CD>:\Common\IdeaCom_Touch\Windows\Release	IdeaCom Touchdriver installation

OS Supported: Windows XP Pro, POS Ready 2009, Windows Vista, Windows 7(32bit only)

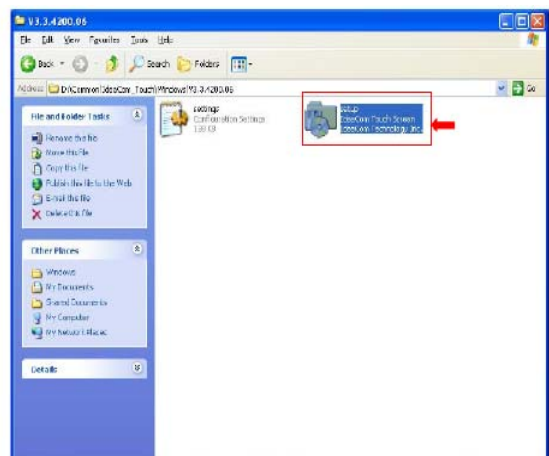

1. Click <Windows> of the IdeaCom Touch section in the driver list menu.

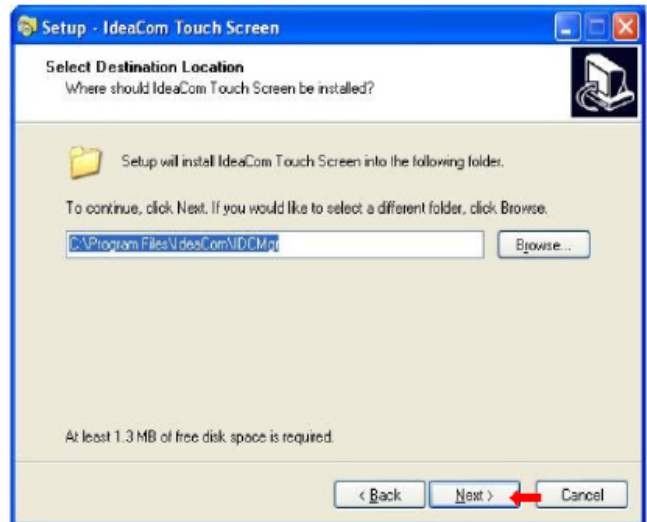

2. Double-click <setup.EXE>

3. Double-click <Setup.exe>

4. Click <Next> to proceed the installation.

5. Click <Finish> to restart your system.

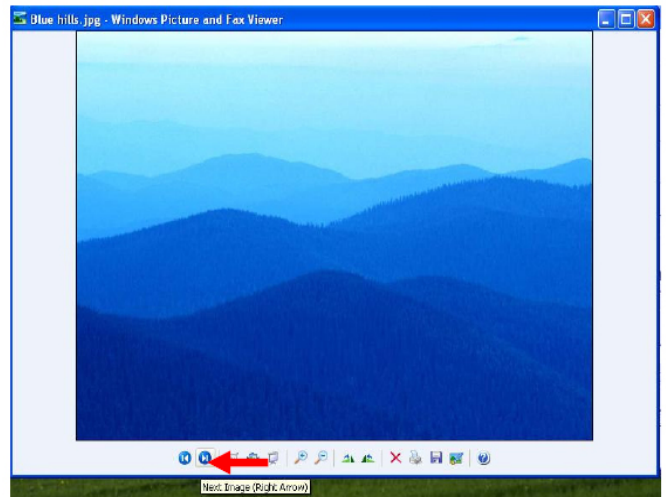

6-4-1. Gesture Setup example for WinXP

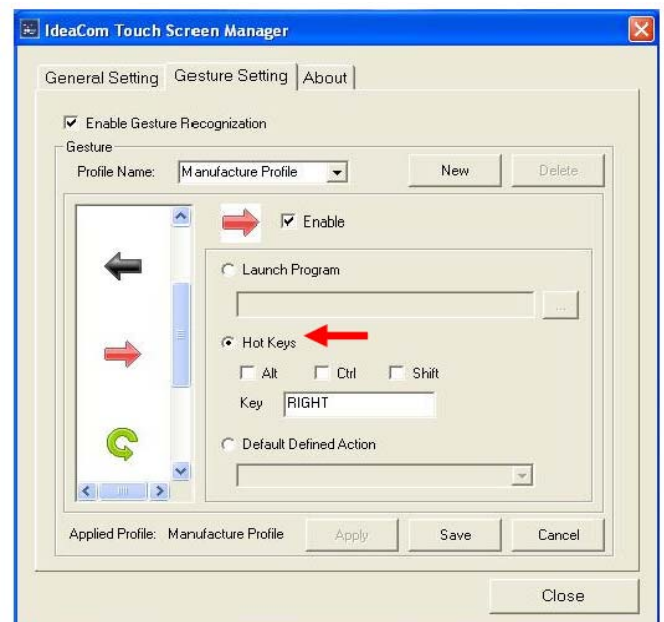

1. Open <IdeaCom Touch Screen Manager> utility.
(You can click IdeaCom Logo or select <Start → Programs → IdeaCom Touch Screen → IdeaCom Touch Screen Manager> open the utility)

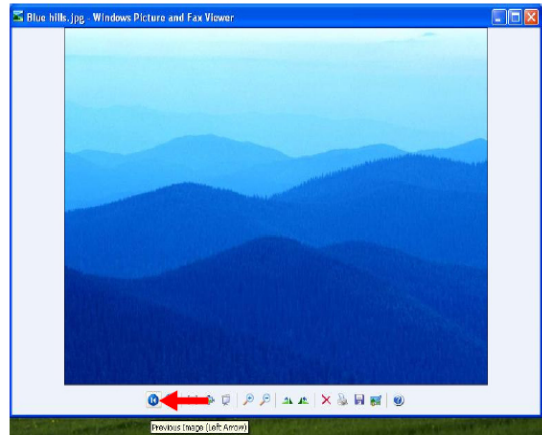

- 2-1. Open <Windows Picture and Fax Viewer> and check <Next Image> hot key

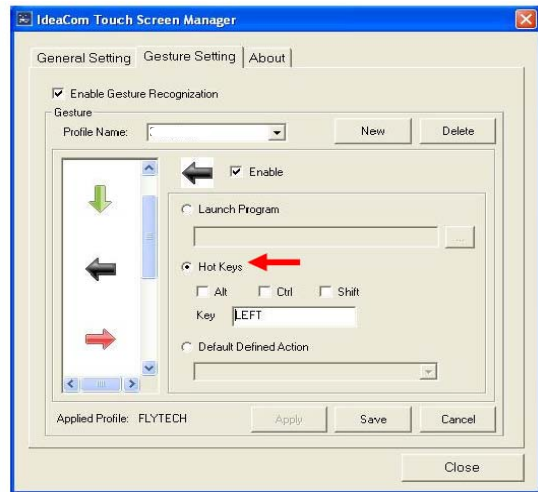

- 2-2.
 - a. Select <Gesture Setting>
 - b. Select <Hot Keys>, then set <Right Arrow> hot key

3-1. Check <Previous Image> hot key

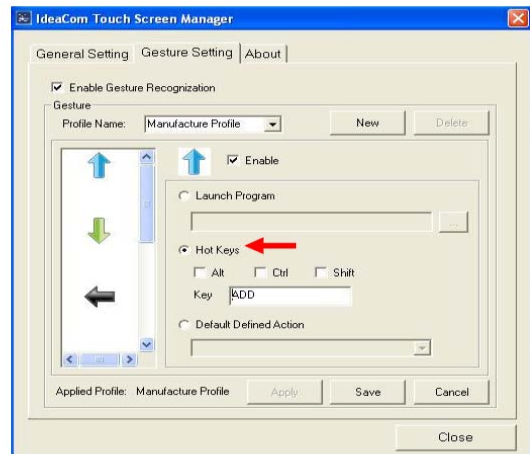

3-2. Select <Hot Keys>, then set <Left Arrow> hot key

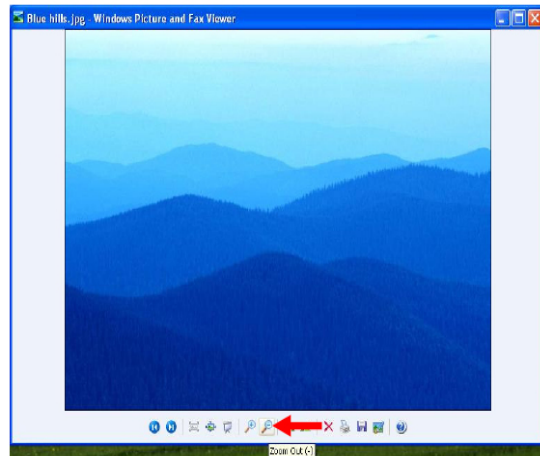

4-1. Check <Zoom In> hot key

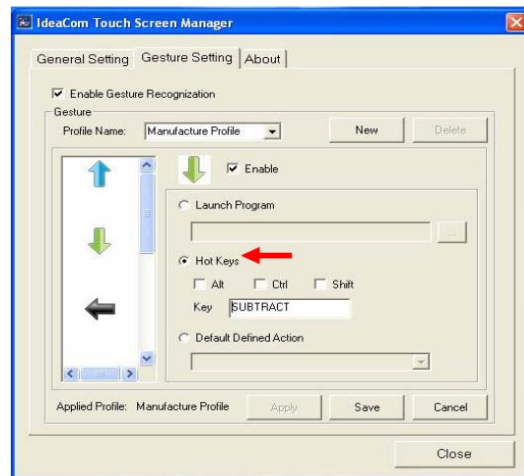

4-2. Select <Hot Keys>, then set <Up Arrow> hot key

5-1. Check <Zoom Out> hot key

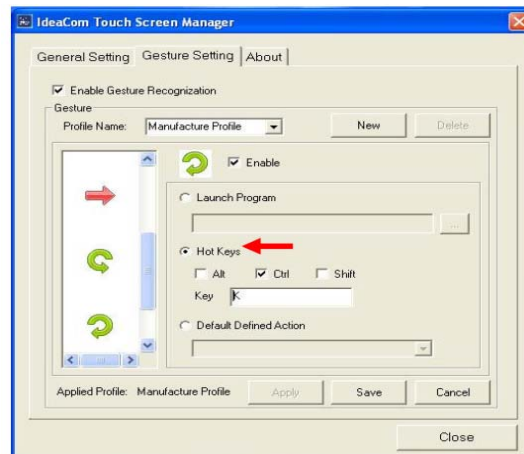

5-2. Select <Hot Keys>, then set <Down Arrow> hot key

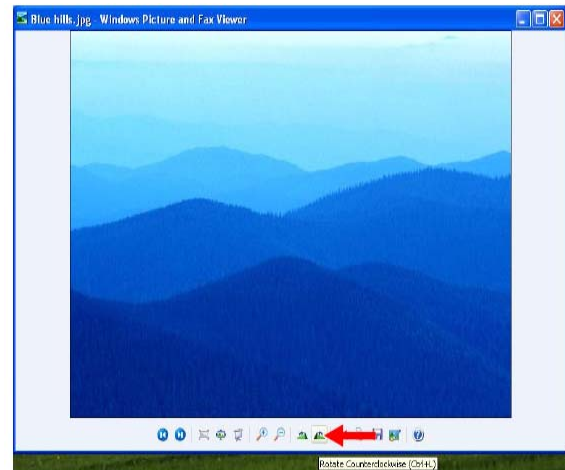

6-1. Check <Rotate Clockwise> hot key

6-2. Select <Hot Keys>, then set <Rotate Clockwise> hot key

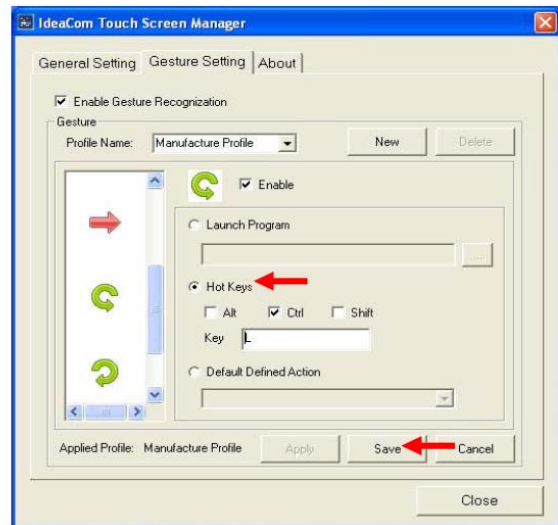

7-1. Check <Rotate Counterclockwise> hot key

7-2.

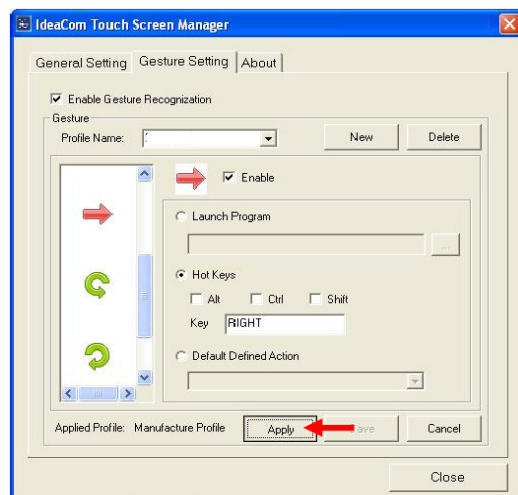

- a. Select <Hot Keys>, then set <Rotate Counterclockwise> hot key
- b. Click <Save>

8. Key in <Profile Name> to save, then click <OK>

9. Select <Apply> and click. Finally click <Yes> to save the setting

6-4.2. Gesture Setup example for Win7

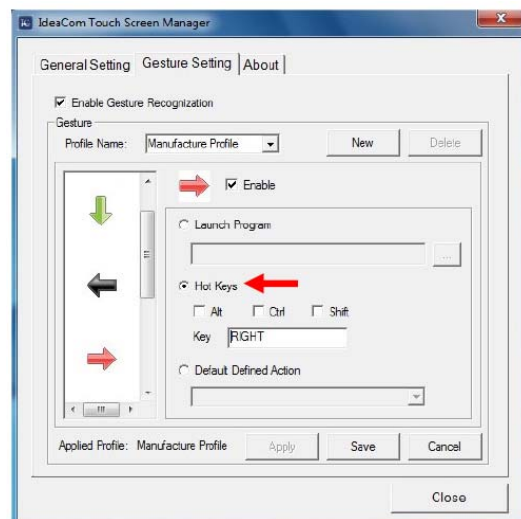

1. Open <IdeaCom Touch Screen Manager> utility.
(You can click IdeaCom Logo or select <Start → All Programs → IdeaCom Touch Screen → IdeaCom Touch Screen Manager> open the utility)

- 2-1. Open <Windows Photo Viewer and check <Next > hot key

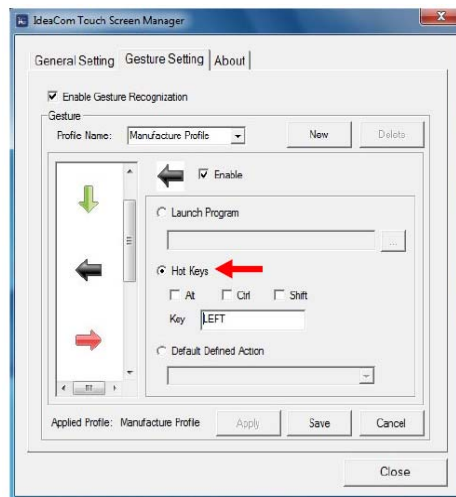

- 2-2.
 - a. Select <Gesture Setting>
 - b. Select <Hot Keys>, then set <Right Arrow> hot key

3-1. Check <Previous> hot key

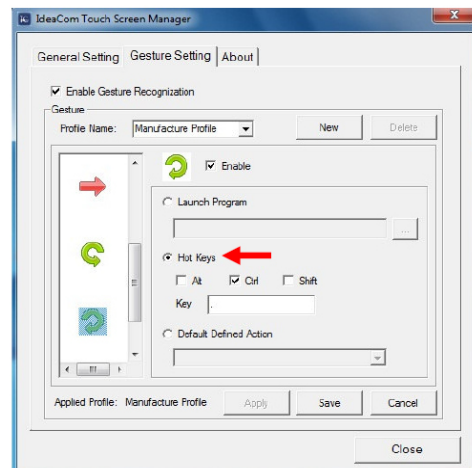

3-2. Select <Hot Keys>, then set <Left Arrow> hot key

4-1. Check <Rotate Clockwise> hot key

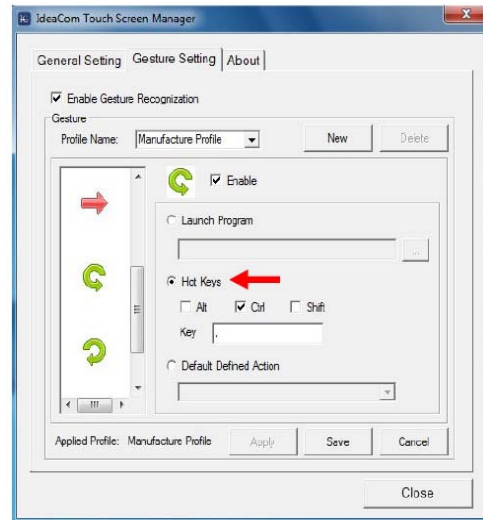

4-2. Select <Hot Keys>, then set <Rotate Clockwise> hot key

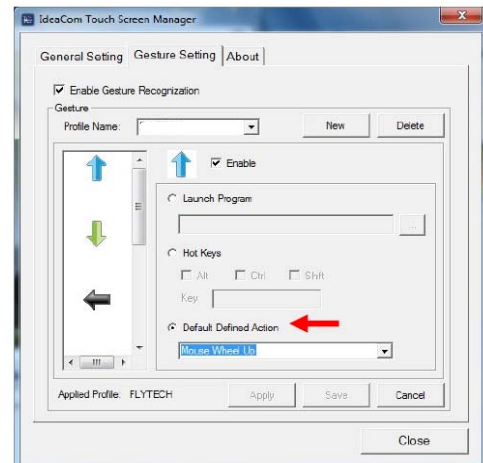

5-1. Check <Rotate Counterclockwise> hot key

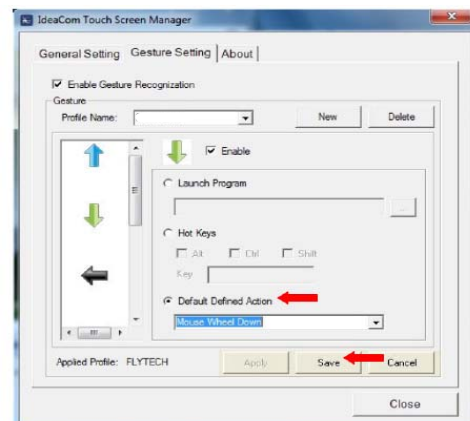

5-2. Select <Hot Keys>, then set <Rotate Counterclockwise> hot key

6. Select <Default Defined Action>, then set <Up Arrow> action for zoom in

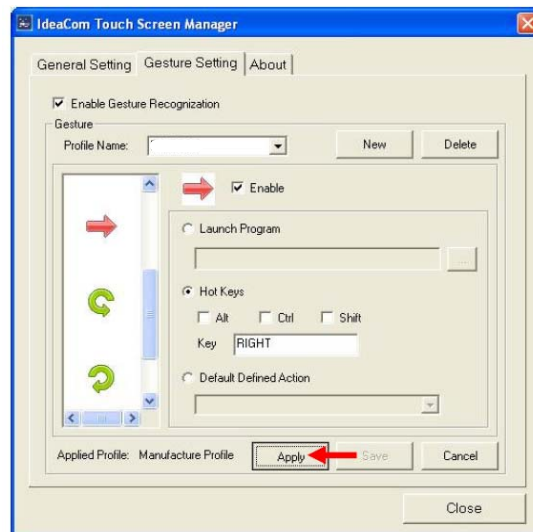

7. Select <Default Defined Action>, then set <Down Arrow> action for zoom out. Click<Save>.

8. Key in <Profile Name> to save, then click <OK>

9. Select <Apply> and clicck. Finally click <Yes> to save the setting

Appendix: Drivers Installation

The shipping package includes a Driver CD in which you can find every individual driver and utility that enables you to install the drivers on the system.

Please insert the Driver CD into the drive and double click on the “index.htm” to select the models. You can refer to the drivers installation guide for each driver in the “Driver/Manual List”.
